

## **MEADOWS PRIMARY SCHOOL and NURSERY GEOGRAPHY POLICY**

### **Purpose of study**

The teaching of Geography at Meadows is done by following the 2014 National Curriculum. The planning and teaching of the subject aims to inspire in pupils a curiosity and fascination about the world and its people that will remain with them for the rest of their lives.

Teaching should equip pupils with knowledge about diverse places, people, resources and natural and human environments, together with a deep understanding of the Earth's key physical and human processes. As pupils progress, their growing knowledge about the world should help them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments.

Geographical knowledge provides the tools and approaches that explain how the Earth's features at different scales are shaped, interconnected and change over time. Fieldwork studies should strengthen children's understanding of their own and wider communities in order to develop a sense of pride and willingness to protect the world around them for the future. It also aims to stimulate the enquiry process of asking and answering Geographical questions about the natural and human worlds, encouraging children to use higher order thinking skills to deepen their understanding and knowledge.

### **Aims -**

- To stimulate children's interest and curiosity in the world around them
- To encourage pupils to ask questions to deepen their understanding.
- To develop respect and understanding for the diverse ways in which people live, and an appreciation of our multi-cultural society
- To be aware of problems in their immediate environment and to enhance children's sense of responsibility for the care of the world they live in.
- To have an appreciation of other people's views and values
- To develop an understanding of social, moral, spiritual and cultural aspects within the subject.

### **Programme of Study-**

The national curriculum for geography aims to ensure that all pupils by the end of each key stage, know, can apply and understand the matters, skills and processes specified in the relevant programmes of study.

#### Key Stage 1

##### **Location knowledge**

- name and locate the world's seven continents and five oceans

- name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas

### **Place knowledge**

- understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

### **Human and physical geography**

- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles
- use basic geographical vocabulary to refer to:
- key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather
- key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop

### **Geographical skills and fieldwork**

- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language (e.g. near and far; left and right) to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.

## **Key Stage 2**

Pupils should be taught about:

### **Location knowledge**

- locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features

(including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time

- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

### **Place knowledge**

- understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America

### **Human and physical geography**

- describe and understand key aspects of:
- physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

### **Geographical skills and fieldwork**

- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
- use fieldwork to observe, measure and record the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.

### **Teaching and Learning Styles:**

The expectations is that Learning and teaching styles will differ from each lesson and will address the needs and wants of the children and the needs and wants of the subject being taught. At Meadows Primary School and Nursery we utilise many learning and teaching styles. During both key stages geography will be taught in a lively, practical way that has relevance to the children's experiences. Topics will be chosen that are of interest to the children and the use of imaginative activities such as story, drama and art will be included.

Geography will be taught through themed based lessons alongside and within other curriculum subjects, eg, Literacy, I.C.T, as well in separate geography lessons.

As far as possible, geography should be biased towards practical lessons, with maps, models and fieldwork playing a key part. Trips and visitors also greatly enhance our geography curriculum.

### **Geography planning:**

Geography is planned for in year group teams and is cross curricular where appropriate. Each teacher has a planning Curriculum folder where guidance can be found for planning each topic at the correct time to ensure progression throughout the school. Activities to ensure National Curriculum 2014 coverage and a progression of skills have been planned by the coordinator and teachers representing Y1/2, Y3/4 and Y5/6.

### **Assessment and recording:**

Formative assessment is the basis for assessment in geography. Work, where appropriate, will be recorded in Foundation books but evidence will also be photographic and on classroom displays.

### **Resources:**

Resources are held in the geography cupboards and within year groups.

### **Inclusion and Differentiation:**

All children must have regular access to Geography appropriate to their stage of development. All children, irrespective of ability, take part in activities both within and outside the classroom in such a way that encourages full and active participation. Every effort will be made to ensure that activities are equally interesting to both boys and girls. Challenge for all is integral to our teaching and we aim to encourage all pupils to reach their full potential through the provision of varied opportunities. Work must be differentiated to aid children's learning. Also, more-able children should be given open-ended tasks and be given opportunities for further research and more challenging studies. We recognise that our curriculum planning must allow pupils to gain a progressively deeper understanding and competency as they move through our school.

### **Community Links:**

Geography at Meadows Primary School contributes to the community by promoting the study and understanding of local sites, including the direct locality of the school. This is

in order for children to have an understanding of their local environment; to develop a sense of pride in their community ensuring they are willing and able to protect it, for future generations.

**Monitoring and review:**

The Geography subject leader and class teacher is responsible for monitoring the standard of the children's work and the quality of teaching in geography. The subject leader is responsible for supporting colleagues in the teaching of geography, for being informed about current developments in the subject and for providing a strategic lead and direction for the subject in the school. The Geography subject leader will complete an annual report where they evaluate the strengths and weaknesses in the subject and indicate areas for further improvement. The subject leader must therefore make full use of non-contact time to undertake monitoring of geography across the whole school.
