22nd May

Forest School Journal

Ancient Egyptian hieroglyphs were painted on the logs for others to translate using the code.

Ancient Egyptian Activities

Our session began with exploration time where we made our own creations and our own decisions and shared the outcomes with our peers.

Following with we were Ancient Egyptians for an hour completing a series of activities.

We made shadufs to move water from low to high ground. It required skills of teamwork, perseverance and problem solving.

We made papyrus paper using parcel paper and a glue mix. We had to weave the strips and solve problems as the wind and glue caused issues.
